This program shall be conducting to know about air pollution, sound pollution and to motivate high school students towards green crackers. Hence the interested students from life sciences are requested to register your name.

Mrs.k.vasavi,

HOD, Dept of Chemistry

## Description of the event

II B.sc students of St. Joseph's Degree college has prepared models related to Air pollution & Sound pollution.

The Department of chemistry visited **S.T.P.P.M.M.C High School, Prakash Nagar, Kurnool**, and our students delivered a good presentation about pollution.

## Objectives

Air pollution level rises extremely high during the Diwali festival. The smoke emitted by burning fire crackers makes the air harmful to breathe. The effects of burning large number of crackers on Diwali can be felt even days after. It is known to cause various diseases.

The main objective to organize this program is

- One way to prevent pollution during Diwali is avoiding the burning of firecrackers.
- To inspire the students towards Green crackers are dubbed as 'eco-friendly' crackers and are known to cause less air and noise pollution as compared to traditional firecrackers.

## Outcomes

- The students also created awareness on the environmental pollution and how to conserve nature.
- The school children were inspired by the presentation and they felt very encouraged and expressed gratitude to the college students and staff for organizing the useful program.
- The students of our college have developed their presentation abilities.
