

## IMPORTANCE OF EDUCATION

“Education makes life worth living.”

I am Areen here to say a few things about importance of education; Education provides stability and confidence in one's life. It's just not about getting a better paid job. It's all about making best version of one. The more learned you are the more humble you become and when you are humble you open the gates of knowledge there by you become wise. Our society needs people who go with justice. “An Education is a tool which transforms something into everything. So my dear friends whenever you get an opportunity to tell the importance of education then take it as your prime responsibility to tell the parents how you can make the dreams of your child come true. Thank you all.
