ENGLISH LANGUAGE DAY

Life is a miracle and every breath we take is a gift. Good morning everyone. I wish you all the best wishes and greetings of English language day. This day was chosen because it is thought to be Shakespeare's Birthday and the Anniversary of his death.

A special kind of Beauty exists which is born "in language, of language and for language". Yes language is a beautiful invention of humanity. Every language has its unique perks but don't you know which is the most famous language across the Globe? I am sure you do. It is the English language.

The English language is one of the important languages on the planet. This is because a study says one out of every 5 people can communicate in English. The language is continuously evolving from thousands of years back. The vocabulary of the English language is extending every year. Around 3000 new words are added to the English dictionary every year.

This language is a necessary tool for those who want to begin their career in the tech domain or in the computing sector.

Now I want to portray my thoughts, according to my level of perception that we enjoy while an American speaks Hindi a little or with a great difficulty we find it to be so admiring & embrace his trail and also encourage him/her to continue the same as we call it cute and amusing. But when it happens with an Indian who has struggled all his life to acquire a proper accent but still fails to satisfy people around and is often made fun of, usually not encouraged and is completely under-valued this practice should be Avoided and Judgment should not be passed on a Bias and both speakers and learners should be encouraged.

This was all from me, **Nusrath Sultan of I MPCs-B,**

Thank you mam, for following me to share my thoughts and put light on the importance of English Day.
