

ST. JOSEPH'S DEGREE COLLEGE.

NAME OF THE STUDENT :- SHAIK. ABDUL SAMMAD ALI

CLASS

:- I-B.COM-D.

Topic :- Importance of Education to One and All

Education is the right of every child and every citizen of our country. in this generation. As a student and educated person it is our duty to make sure that each and every one get basic education. Education is not mere reading or writing. It is something which helps to gain knowledge about a whole lot of things from a tiny microbes to the vast universe. Our education should have a proper use that we can make illiterate to be literate to some extent. I am not saying to make them achieve degrees but I want to say that atleast teach some basics like Alphabets, small words etc. so that they can recognise and read them and they can have basic knowledge. For example, if we take Telugu, a local and native language many people can speak but they can't write and identify what is written in their own language and same with Urdu language too.

In my view it is a great drawback of our education system. Today in our society, the situation is like educated people are suppressing the uneducated. Not all, but to some extent.

So, at least educate the people around you. It may be your home (or) neighbours. So that they are able to recognize words and able to write some basics like their names etc. We all gather here to get educated and gain knowledge. So my humble request is don't let your education be wasted, make your education have some value, usefulness, ethics in your life. With education not only we gain knowledge but also respect from society. Spread your knowledge and make our country, our state a educated state/nation at least some extent like Kerala.

Let us see my life experience and my mother "S. Halima Bee" as an live example. I am proud to say that My Mother restarted her education and passed her 10th [SSC] just two years back i.e. in 2019. along with my sister. At first she used to say that she is a house wife when other asked her.

Now the scenario has changed. She has changed from housewife to home maker. She gained respect in our locality. She is standing on her own legs and rising her head proudly in society. She became a earning and supporting my father. and that miracle word 'Education' changed the whole scenario of my mother's life and our family's life too. One should know the value of education and Education is very important to every one. See that only SSC certificate is feeding our family. So I would like to conclude by saying that age is no bar when it comes to education. What one needs is willpower and thinking. As the saying goes, "Where there is a will there is a way!" We should all thank to god and our parents those who are getting education and pray to god for uneducated. By the end we can say that Education throw its shining light in each & every citizens life if we follow above.

—x Thank You x—
