

Report on Field Visit to Prakriti Vermicompost

The Department of Zoology, St. Joseph's Degree College, organized a field visit to Prakriti Vermicompost on 28 March 2024. Students were educated on the vermicomposting process, including organic waste preparation, the role of earthworms, and compost production. The visit provided hands-on experience and highlighted the benefits of vermicomposting for sustainable agriculture and waste management.

The visit was informative, offering students practical knowledge of eco-friendly composting methods, and was a valuable learning experience.
